

# SEDONA

## Insulated Metal Panel

The Sedona Wall Panel combines the rugged performance of simulated stucco texture with the appearance of a flat architectural wall panel. This unique combination of an insulated metal panel with the characteristic look of the Southwest, provides superior insulating performance that blends well with traditional masonry stucco buildings and tilt-up concrete. Sedona Panels are ideal for the exterior walls in the construction of temperature controlled, industrial and commercial buildings.

Trust TrueCore's Sedona, produced using veteran knowledge and experience for the industry's best contractors.
